

February 2015 – Seminars on non parametric and semiparametric techniques

The seminars are open to Phd, post doc and senior researchers. They are part of the research activities at the Department of Economics and Management and the Phd EMIS in Economics and Management of Innovation and Sustainability (joint UNIFE-UNIPR).

Free registration by email: mzzmsm@unife.it

Venue: DEM University of Ferrara, Via Voltapaletto 11 Ferrara

Organisers

Antonio Musolesi (lecturer in Econometrics at DEM) and **Massimiliano Mazzanti** (EMIS coordinator), University of Ferrara

Monday 9/2 - Lunch Seminar – 13.00 - **Simon Wood**, University of Bath, Nonparametric regression via generalized additive models, **Room EC6 – First Floor**

Thursday 12/2 - 9.30-12.30. **Michel Simioni**, Toulouse School of Economics (TSE) - Lecture on nonparametric density estimations, **Room EC7 – First Floor**

Friday 13/2 – 9.30-12.30. **Michel Simioni**, TSE - Lecture on nonparametric regressions, **Room EC6 – First Floor**

Friday 13/2 – 14.00-17.00 **Room EC6 – First Floor**

- **Simone Giannerini**, University of Bologna (UNIBO), Nonparametric tests of nonlinear serial dependence in time series based on entropy measures.
- **Antonio Musolesi**, UNIFE, Nonparametric modelling of the regional knowledge production function
- **Michel Simioni**, TSE, The effect of pollution abatement on technology: comparing parametric and conditional nonparametric stochastic frontiers
